WideTEK® 44/48 wide format CCD scanners digitize documents up to 48 inches wide quietly and at astonishingly fast speeds, perfect for large high volume production environments. WideTEK® 44/48 gently scans with special transport rollers ensure safe document transport. For historical and fragile documents, this is critical. The new, unique background drum does not touch the glass plate at any time, avoiding scratches and document skews. To achieve extra contrast on sepias and film based documents, the standard black drum can be easily exchanged with a white drum, with no tools required. State of the art illumination using bright white LEDs guarantees a long lifetime and low cost of ownership with no consumables necessary over the life of the product. Cutting edge camera technology with a dust-protected, fully sealed CCD camera box delivering crisp FADGI compliant 1200 dpi images.

Sturdy and durable steel chassis, not plastic. WideTEK® 44/48 is robust and scans fast for the most demanding applications, always delivering quality images
