Your **#1 solution** for free & reduced meal application processing

Advancing food service with RocketSCAN technology

RocketSCAN accelerates & automates your meal application processing

- Speeds processing, enhances documenting & improves audit results
- Reduces labor & stress by eliminating tedious sorting & filing
- Increases accuracy by eliminating data entry errors
- Ability to add, change & move data during initial validation review (based on current district rules)
- Provides application data, status & image on comprehensive audit cds
- Access to RocketSCAN's best practices forum

Premier services at an affordable price point

Part of our comprehensive service commitment to our customers is the development of new applications for your district every year. This service ensures your applications comply with all state & federal guidelines.

- RocketSCAN technical support experts are available to your staff 24 / 7 by phone or email - ensuring minimal down time
- Applications are available in thirteen languages, including Spanish, Chinese, Hmong and Vietnamese

RocketSCAN streamlines application processing. Here's how it works:

Three Easy Steps!

1 Scan Module

This module confirms quantity of applications & assigns a batch number

- Instantly recognizes invalid applications
- Ability to print a detailed batch cover sheet to file with applications
- Your staff can scan & store as many as 20,000 applications/day per scanner
- INR software automatically matches the student names for research

2 Validation Module

A simple process of comparing the scanned application with RocketSCAN results

- All USDA & state guidelines are embedded in RocketSCAN software
- Checks for valid student & SNAP/TANF numbers, preparer's SSN, foster child status
- 3x faster than competing solutions
- Staff retains ability to update applications during this process
- Automatically creates notes for applications requiring further inquiry

3 Administration Module

A simple export function releases compliant applications to your free & reduced software for meal status determination

- Ability to manage all applications in organized sortable queues for follow up
- Improve your audit results with our electronic "sticky note" feature

Powered by

Intelligent Name Recognition (INR)

- Exclusive to RocketSCAN
- INR software reads handwritten student names
- Simple process of comparing student's name to POS database by validator
- Eliminates correcting individual characters (ICR)
- More dependable than conventional character recognition technologies

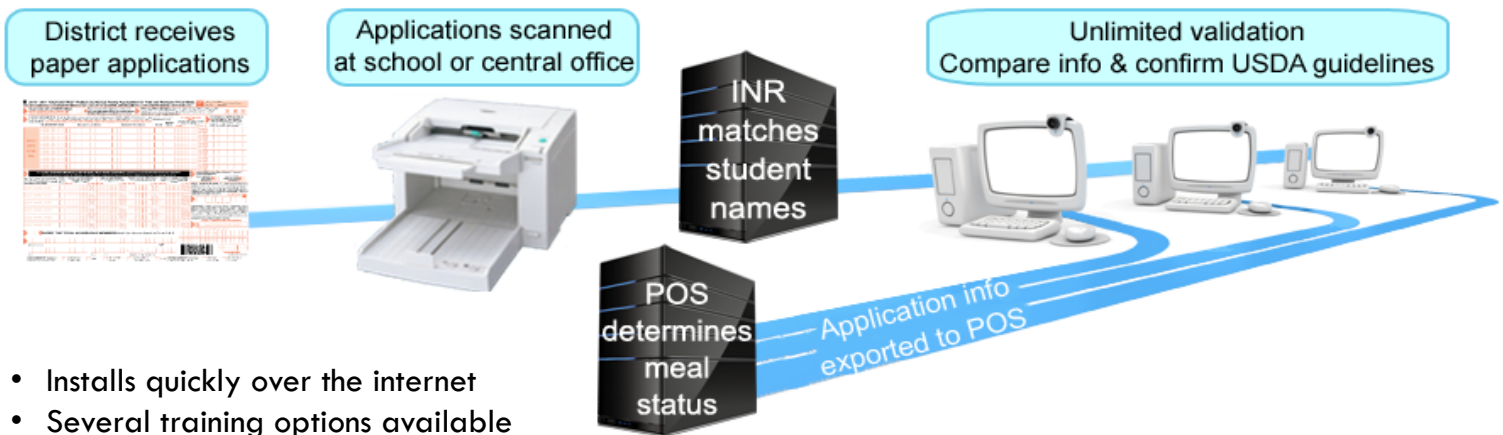

Results you can trust

- **600 or more applications will be processed per person per eight hour workday**
- **Includes individual performance tracking**

Behind the scenes of the RocketSCAN process

- Installs quickly over the internet
- Several training options available
- Reduces annual costs

Instantly retrieve applications electronically

Your staff will no longer spend hours searching for & retrieving a specific child's paper application.

- You can answer parent inquiries about meal status or other questions in seconds - no more call backs!
- Our electronic "sticky note" feature allows you to attach notes to applications, providing a history of the inquiry process.

Need to access the original application? no problem

RocketSCAN organizes scanned applications into sequentially numbered batches. RocketSCAN tracks the batch location for each application, so when you need to view the original, simply pull the batch of paper applications and quickly find the one you need.

- But trust us, when you can view and print any application on your computer in seconds, you won't be looking through paper documents any longer!

Affordable quality without the sacrifice

RocketSCAN has the highest level of software functionality & service in the industry. Our solution offers many features our competitors don't have at a comparable price point.

The best part is that your investment in RocketSCAN pays for itself within the first year of use.

RocketSCAN is the ultimate solution for your budget and business needs, and as a bundled solution, there are no hidden charges.

You have the freedom to install RocketSCAN on an unlimited number of workstations. RocketSCAN is compatible with most free & reduced software packages.

Processing on the fly

Validators can update applications on the fly, dramatically reducing the amount of applications that need second review. RocketSCAN eliminates the need for any additional quality assurance.
